Dear **Mr. Hariom Chandra Tripathi**,

Greetings from **IIT Mandi Catalyst**!

Thank you for expressing interest in incubating your startup for **Agripredictx** with IIT Mandi Catalyst. Based on the information shared in your application and pitch deck, we are pleased to inform you that your startup has been **shortlisted for the next stage** of our incubation process.

We appreciate the vision behind your venture and are excited about the possibility of supporting you in building and scaling your business. At IIT Mandi Catalyst, we aim to help promising startups move from early-stage development towards product validation, market access, investment readiness, and sustainable growth.

1. Incubation Models

IIT Mandi Catalyst offers two incubation models:

- **Incubation Fee Model:** The startup pays an applicable fee in exchange for incubation facilities and support services.
- **Equity Model:** The startup offers an equity stake in exchange for incubation support, as per the applicable terms and conditions.

> **Action Required:** Please confirm your preferred model by replying directly to this email.

2. Funding Opportunities and Startup Support

One of the key advantages of being associated with IIT Mandi Catalyst is access to a broader startup support ecosystem. We facilitate opportunities through government funding schemes, CSR-supported programmes, institutional grants, and investor networks, depending on the startup's stage, sector, eligibility, and funding requirements.

Our programmes have included initiatives such as **MeitY GENESIS, NIDHI-PRAYAS, NIDHI Seed Support System, Startup India Seed Fund Scheme, TIDE 2.0, Him Startup Yojana, and CSR-supported incubation programmes**, among others.

Our support extends beyond funding opportunities and may include **mentorship, business model**

refinement, product development guidance, market connections, investor outreach, pitch preparation, and fundraising support.

Our portfolio demonstrates the potential of startups to progress towards significant funding and commercial milestones. For example:

- **Medyseva Technologies** raised ₹4 crore in a round led by Unicorn India Ventures.
- **Mitigata** raised US$5.9 million in Series A funding led by Nexus Venture Partners.
- **Deep Algorithms Solutions** raised approximately ₹10.8 crore in seed funding led by Unicorn India Ventures.
- **WattCycle Sustainable Solutions** received a ₹10 crore grant commitment from GIC Re.

Note: While we actively facilitate relevant funding opportunities, incubation does not guarantee any grant, investment, loan, or other financial assistance. Funding is subject to the availability of programmes, eligibility criteria, independent evaluation by the relevant funding agency or investor, and the startup's readiness and performance. However, our established funding programmes, investor connections, and experience supporting startups provide a strong foundation for founders seeking to pursue these opportunities.

3. Next Steps: Founder Presentation and Due Diligence

Upon receiving your confirmation of the preferred incubation model, **my colleagues will reach out to you** to schedule a presentation of your startup before the evaluation team.

The shortlisting decision has been made based on the information presented in your application and pitch deck. The next stage will provide an opportunity to understand your business, technology, market potential, progress, and future plans in greater detail.

Please note that shortlisting is **not a confirmation of admission**. Progression to formal incubation will be subject to the evaluation of your presentation and the subsequent due diligence process conducted by IIT Mandi Catalyst. Final admission will be communicated after the relevant evaluation and due diligence requirements have been completed.

We look forward to learning more about your venture and exploring how IIT Mandi Catalyst can contribute to your entrepreneurial journey.

Kindly reply to this email with your preferred incubation model so that we can initiate the next steps. Once confirmed, my colleagues will get in touch with you shortly.

We congratulate you on reaching this stage and look forward to the possibility of welcoming your startup to the IIT Mandi Catalyst ecosystem.

With best regards,

Rishi Sharma
